The AESCO/MADSEN DM Series of drum mix asphalt plants are designed with the demanding asphalt contractor in mind. Affordability, simplicity of erection, user-friendly operation, end product consistency, and production rates that meet or exceed expectations are all features that make this series of asphalt plants a solid investment. These superb plants are environmentally compliant with U.S. regulations. They are built with high-quality materials that resist abrasion, high temperatures and corrosion. Configured with a venturi wet scrubber system or a baghouse all mounted on the same frame as the drum mix dryer, five sizes are available and are engineered with a comprehensive list of options to suit every customer's needs.
