If you liked our **Hammermill Rap Crusher**, you'll like it even more when it is installed on our **Model 48 RAP Processing Trailer**. A complete RAP feeding, crushing and sizing system, the **Model 48 RAP Processing Trailer** includes a variable speed RAP feeder, vibrating screen, hammermill RAP crusher and a final product RAP discharge conveyor. This system is mounted in-line on a portable trailer frame, and includes a control system which interfaces to any asphalt plant to automatically feed the required amount of RAP to your process, or stand alone when using it for RAP crushing, sizing, and stock piling operations only. Be sure to ask your AESCO/

MADSEN Sales

Representative for more information about our **Model 48 RAP Processing Trailer**.

AESCO/MADSEN's Hammermill RAP Crusher pulverizes RAP material up to 8 inches in size in only one pass, saving time, money, wear and tear.
